

Pro10 is hands-down better than walkie-talkies

		
<p>QUAIL DIGITAL PRO10 HEADSET</p>		<p>WALKIE-TALKIES</p>
<p>Worn neatly on your head, leaving you hands-free to do your job successfully</p>	<p>HANDS-FREE</p>	<p>Always have one hand holding walkie-talkie, so forced to perform tasks with one hand</p>
<p>Comfortable, lightweight and easy to use with simple push button functionality</p>	<p>DESIGN / COMFORT</p>	<p>Must be clipped to a surface, removed for use and reclipped, distracting from duties</p>
<p>Headset with noise cancelling technology keeps messages private and does not disrupt customer service</p>	<p>CUSTOMER DISRUPTION</p>	<p>Messages are heard by everyone over loudspeaker, degrading the customer service environment</p>
<p>Single channel enables full team communication and no missed messages</p>	<p>CHANNELS</p>	<p>Multiple channels fragment communications, potentially causing missed messages</p>
<p>Fully duplex digital platform allows up to 6 people to talk at once for efficient communication between staff</p>	<p>USER ACCOMMODATIONS</p>	<p>Typically, on a lower quality analog audio platform that is simplex, allowing only one person to talk at once</p>
<p>Up to 70m range, easily extended with the addition of base stations</p>	<p>RANGE</p>	<p>Depends on environment, but once out of range, no possibility of communication</p>
<p>Fully encrypted DECT base station solution offers privacy with no outside interference</p>	<p>PRIVACY</p>	<p>Operate on shared uncoordinated frequencies, so possible missed messages</p>
<p>Can accommodate integration with external audio systems</p>	<p>INTEGRATION</p>	<p>Point-to-point communication only with no integration capabilities</p>
